Automated Transaction Processing

Automated Transaction Processing: Revolutionising EFTs

Our Automated Transaction Processing platform, where Electronic Funds Transfers (EFTs), Credit Transfers (CTs), Direct Debits (DDs) and Standing Orders, are seamlessly managed with full automation.

The benefits of Automated Transactions

Efficient EFT Automation - Experience the power of full automation with our transaction processing system. Say goodbye to manual intervention and streamline your transaction processing workflow for maximum efficiency.

Instant Transaction Execution - Our platform ensures instant execution of transactions, eliminating delays and minimising processing times. Enjoy real-time transaction processing without the need for manual approval or intervention.

Automated Verification and Validation - Benefit from automated verification and validation processes, ensuring accuracy and compliance with regulatory requirements. Our system performs thorough checks to validate transaction details, reducing the risk of errors and fraud.

Seamless Integration with Financial Systems - Integrate our Automated Transaction Processing platform seamlessly with your existing financial systems and workflows. Enjoy hassle-free connectivity and data synchronisation for a cohesive transaction management experience.

Enhanced Security and Compliance - Rest assured that your transactions are processed with the highest level of security and compliance. Our platform employs advanced encryption techniques and adheres to industry regulations to safeguard sensitive financial data.

Scalable and Flexible Architecture - Our Automated Transaction Processing platform is designed to scale with your business growth. Whether you're processing hundreds or thousands of transactions, our system adapts to your needs seamlessly.

SEPA Instant Payments

A game-changer for the Irish banking landscape. This EU driven initiative mandates that Irish Payment Service Providers (PSPs) offer the ability for consumers to receive and send a credit transfer within x10 seconds. PSP compliance dates differ between receiving (January 2025) and sending (October 2025) CTs in this way. The value add to the consumer to clear, however the risks and educational awareness requirements are significant. An efficient, scalable data centre environment and continuous engagement with the many stakeholders will see this project successfully delivered.
