

Business Intelligence

Make data-driven decisions.

culnsight is our powerful Business Intelligence offering which allows you to better understand and analyse key membership data, keep abreast of trending behaviours, and help mitigate risk, all creating opportunities that can help grow your Credit Union.

The software empowers users to access and discover their Scion data to drive day-to-day business decisions. Using a combination of tables and visual displays, your staff can analyse data across multiple dimensions.

Make data-driven decisions.

Credit Control - Track loan performance and incorporate trending and risk analysis with our Credit Control reports.

Anti-Money Laundering (AML) - Monitor customer due-diligence and track suspicious transactions continuously with AML reports ensuring regulatory compliance.

Lending - Analyse your member's borrowing habits, including amounts, loan types, time of year they apply, to more effectively market your loan offerings to them.

Operational - Operations reports help you manage your branch performance and business, allowing you to allocate staff accordingly.

Membership - Understand your members like never before with rich demographic data, from ages and locations to occupations and behavioural trends.

Custom Reports - Scion hosts a wealth of data and you have the complete freedom and flexibility to create your own reports from scratch.

Build Custom Reports

With over 150 pre-built reports, charts and dashboards in your reporting tool, it is easier than ever to use your member data to drive your day-to-day business decisions. Slice and dice the data in existing reports to create your own custom reports! The colourful dashboards, graphs and reports give you new ways to view your data. Export to PDF, CSV or Excel and share with others.
