

Digital Signature Pads

Bring digital into your branch with Digital Signature Pads.

Our Digital Signature Pads allow your members to sign documentation at the counter using a touch-screen pad and pen.

This not only speeds up counter transactions but automatically stores the digitally signed document in your core system, removing the need to print, sign and scan the paper copies. All of this is, on average, 4 times faster than the manual process.

Multiple forms are available within Scion that can be sent to the pads for members to sign, ranging from loan applications to credit agreements and withdrawal dockets.

How does it work?

Any documentation available within Scion can be produced through the pads for members to sign, ranging from loan applications to credit agreements and withdrawal dockets.

Customer Success

“Having a digitally signed document means we now do not have to locate, print, scan and file the physical paper document. This has drastically improved our efficiency, allowing our staff to focus on developing member relationships or other important tasks within the Credit Union.”

Digital Signature Pads are a key tool to help us promote a greener Credit Union. We’re continuously looking at ways to reduce our carbon footprint and reducing paper is a key priority. Our green ethos coupled with a seamless member journey at the counter, mean our members leave our branch feeling very happy with their experience.”

John Doyle | Operations Manager | Newry Credit Union

Time Saving - Members can quickly and easily sign forms and your staff don't need to print, scan and save documentation. Digital Signatures prove to be 4x faster than paper-based signatures.

Modern documentation - Forms are saved as a PDF format, meaning a more modern and attractive member-facing document and less storage space used per doc within Scion.

Free advertising - When the pads aren't active, you can display adverts, flyers or images on them in screensaver mode, providing free digital advertising within your Credit Union.

Eco Friendly - Digital signature pads minimise paper and printing needs, while also reducing storage space requirements.

Customer Success

We began using the Digital Signature pads in early 2023. It has been a momentous change for both our staff and our members. Saving us time filing and scanning applications and offering our members a seamless and speedy service.”
